MORRILL ENGINEERING PROGRAM

The mission of the Morrill Engineering Program (MEP) is to empower African American, Hispanic, and Native American engineering students, support their success as scholars, and leverage a community of students, staff, and alumni to achieve excellence in engineering. The MEP community enhances the undergraduate experience through academic support, scholarship assistance, and professional preparation.

What the Morrill Engineering Program Provides:
- Student workshops and retreats
- Undergraduate advising
- Facilitated Study Groups
- New student orientation
- Mentoring classes and awards
- Community, collaboration, and mentorship

Student Organizations:
The following student organizations are great resources. They provide a supportive environment, potential study/homework partners, and peers that may be encountering the same problems or issues. These organizations are advised by MEP and share the same mission.

- American Indian Science and Engineering Society (AISES)
- National Society of Black Engineers (NSBE)
- Society for Advancement of Hispanics/Chicanos and Native Americans in Science (SACNAS)
- Society of Hispanic Professional Engineers (SHPE)
- The National Organization for the Professional Advancement of Black Chemists and Chemical Engineers (NOBCChE)

There is no limit to what you can do in Engineering at Illinois.
